

Core Competencies

Cloud Architecture & Migration. Azure landing zones, tenant migrations, hybrid connectivity, and infrastructure as code with Bicep and Terraform.

DevSecOps & Automation. CI/CD pipelines, SAST/DAST integration, policy-as-code, Microsoft Defender for Cloud, Zero Trust baselines.

Cloud FinOps & Cost Optimization. Spend analysis, right-sizing, serverless migration, governance guardrails.

IT Training & Curriculum Development. Instructor-led Azure and DevOps training, hands-on lab environments, custom curriculum for teams.

Principal Experience

Work led by our principal engineer includes:

- Tenant-to-tenant migration of **150+ applications** for a national distributor — secure landing zones, dependency mapping, zero-loss cutover
- **80% Azure SQL cost reduction** via serverless migration in a FinOps engagement
- AKS platform builds, Zero Trust baselines, and compliance-aligned IaC across HIPAA, GDPR, and PCI-DSS environments
- **42 production-context hands-on labs** authored for cloud engineering training

Differentiators

- **Senior from day one.** No account layers, no handoffs — the engineer who scopes the work delivers it.
- **Infrastructure as code, always.** Everything we build is versioned, repeatable, and documented. You own the code and can run it without us.
- **Teach as we go.** Every engagement transfers knowledge — runbooks, walkthroughs, and training so your team operates what we build.

COMPANY DATA

UEI
LZHNRGY8U3L8

CAGE CODE
22GL8

PRIMARY NAICS
541512 — Computer Systems Design Services

ADDITIONAL NAICS
541511 · 541519 · 611420

BUSINESS TYPE
Small Business · Minority-Owned · Black American Owned

REGISTRATIONS
SAM.gov (registered) · Atlanta, GA · Founded 2024

Principal Credentials

M.S. Cybersecurity & Information Assurance ·
CompTIA Security+ · Pentest+ · CySA+ · ITIL v4 ·
AZ-305 (in progress) · DP-700 (in progress)
